Experience:

I specialize in Microsoft Asp.Net Core website development and Javascript Node.js website development, Window/Red Hat Enterprise Linux OS Management and VM Management, Android Mobile Game. I have been more than 10 years in the software development/management field. I enjoy communicating with clients and implementing the client's vision in developing their websites or other projects. I love coding and enjoy working with team members or business partners. I am still evaluating and upgrading my skills so I am trying to stay at the cutting edge of web/mobile game development and web server operating system management. I am eager to grow with this company. I really look forward to the opportunity to join your team.
